Clarification: Step-rating Assignment for Operations That Source Outside Market Animals –

Standard Program Requirements Section 6.b (Pigs, Meat Sheep, Meat Goats, Bison, Laying Hens, Meat Chicken); Section 5.c (Turkeys); Page 1 (Beef); and Section 6. iii. (p.38) of the Policy Manual v1.0.

Issued and Effective June 26, 2018

Given that in the Standard's Program Requirements Section for bullet 6.b (Pigs, Meat Sheep, Meat Goats, Bison, Laying Hens, Meat Chicken); Section 5.c (Turkeys); Page 1 (Beef); and Section 6. iii. (p. 38) of the Policy Manual v1.0 could use further explanation, GAP has issued the following clarification.

For any operation that sources market animals/poultry from another operation and plans to market them as Step-rated:

1. The source operation(s) must have a current 5-Step® certificate; and
2. The highest Step-rating the operation can achieve **cannot be greater** than the source operation.

Examples

1. A finishing operation purchases weaner pigs from three different operations. The source farms each hold a Step 1 certificate. Even though the finishing operation could achieve a Step 3 based on its management of finishers, it can only achieve a Step 1 certificate as it sources from lower Step-rated operations.
2. A feedlot purchases backgrounders from operations that hold Step 4 certificates (including cow-calf operations). Although the source operations have Step 4 certificates, the feedlot can only achieve a Step 2 certificate due to its management of finishers at its own operation.
