

G.A.P.'s 5-Step[®] Animal Welfare Standards

Audit Prep Tool

Turkeys v2.1

When Should I Use the Audit Prep Tool?

The purpose of this tool is to provide turkey producers with a simple checklist to help identify where farms may have issues with compliance to G.A.P.'s 5-Step[®] Animal Welfare Standards for Turkeys v2.1. While this Audit Prep Tool covers many of the key requirements in our Turkey Standards, it does not cover every standard. Using this tool does not guarantee that you will pass an audit, but should help you prepare for one. This tool can be used if you are preparing for a new audit or if you are getting ready for a renewal audit. Being prepared for the audit helps to identify and resolve issues before the auditor visits your operation, which in turn, helps the certification process go more smoothly.

Who Should Complete It?

Since this Audit Prep Tool was designed to help you get organized for your audit, it would be most beneficial if it were completed by the person(s) responsible for managing the operation and/or an animal caretaker.

How Do I Use this Document?

This tool has been divided into sections so that you only need to focus on the sections relevant to your operation. The first section covers the core requirements for ALL Step levels. From there, the document is divided up by Step level – this allows you to skip to the section that's relevant to the level you're looking to be certified to. As well, if you're looking to move up the Steps, this tool can be used to help identify what your operation would need to do. Finally, we have provided a checklist for written records and documents that you'll need to have. The auditor will be looking for these documents during the audit, so if you're missing any, please check the Turkey area of our website for templates to get you started.

How Do I Know if My Operation Might Have Issues with Compliance?

If you tick the shaded green boxes, then there is a good chance that you are in compliance with the Standard. In certain circumstances, a specific standard may not apply to your system, in which case you will also have the option to tick the 'NA' box. If you tick any non-shaded boxes, or are uncertain about any of the questions, we recommend reviewing our resources in the Turkey area of the G.A.P. website or checking in with your certifier for additional help before scheduling the audit.

Where Can I Get More Help?

You can find additional information, including additional resources and templates, on the Turkey area of the G.A.P. website. If you have any questions, feel free to reach out to your certifier or the Farm Animal Welfare team (standards@globalanimalpartnership.org) at G.A.P.
